

The 23rd ZESTY Network Seminar

Tuesday 5 July 2016, 17:00-19:00
5F Auditorium, Chemistry Main Bldg.
Free of Charge, no registration required

Oral Presentation (17:00-18:00)

Satoru MURAMATSU (Tsukuda Lab.)

Oxidative addition of CH_3I to Au^- in the gas phase

Rui SHANG (Nakamura Lab.)

Recent developments on iron-catalyzed directed C-H activation/C-C couplings with carbon nucleophiles

Liang-da CHIU (Ozawa Lab.)

Hybrid fluorescence-Raman microscopy for the visualization of protein-metabolome interaction

Short Talk Given by Poster Presenters (18:00-18:15)

Mixer & Poster Presentation (18:15-19:00)

Shinichi FUKAHORI (Yamanouchi Lab.)

Determination of absolute CEP by circularly-polarized few-cycle pulses

Masaya KOMINE (Ohkoshi Lab.)

Synthesis, crystal structures and magnetic property of cyanide-bridged Ln-Mo bimetal assemblies

Hoi Lun TSOI (Goda Lab.)

Particle manipulation with surface acoustic waves in a microfluidic device

Kenya TAJIMA (Suga Lab.)

EF-G-dependent uncoupling of mRNA and tRNA movement in ribosomal synthesis of polyproline-peptides

Quian ZHANG (Shionoya Lab.)

Construction of oxygen- and carbon-centered gold(I) clusters supported by N-heterocyclic carbene ligands

Masaki SHIMADA (Nishihara Lab.)

Strong solid-state luminescence of disilane-bridged donor-acceptor-donor and acceptor-donor-acceptor arenes

Dai KUTSUZAWA (Hasegawa Lab.)

Thickness effect on electrical transport properties of RuO_2 epitaxial thin films
